[REDACTED]

Two or three 18-ton railroad cars with green window-tinted leather pieces, presumably waste from tanneries and leather processing plants, were daily unloaded at the plant.

b. Work force: Two or three shifts, each with 350 to 400 laborers.

c. Production: Rubber plates, rubber soles. For plant layout see Annex 2.

4. Power Plant:

The plant covers about 400x600 meters. The red brick structure of the main plant building is 25 meters long and has three small sheet-metal roofs. The building resembles a ship. The plant is peat-fueled. The fuel is conveyed by wire ropes in the north section. For plant layout see Annex 2.

5. In addition to rubber boots with lined tubes the daily output of the old Shinizavod is about 1,000 tires.

6. India rubber packed in 85 lb. bales arrived from the outside. Linen rolls were supplied by the Kirov thread spinning mill. Twelve hundred laborers worked three shifts. For plant layout see Annex 3.

☐ Comment:

This report is the first to give details on the layout of the three neighboring plants in the northern town section of Kirov. Data require confirmation and supplements. The location recorded by Annex 1 is correct and was repeatedly confirmed.

3 Annexes, sketches on ditto: 1. and 2. Rubber Plants and Power Plant in Kirov.

3. Old Shinizavod Plant.
